A Place to Grow:

Where learning continues beyond the school day

Our Before & After School Programs offer students enriching opportunities for discovery and exploration before and after the normal school day hours. These programs provide numerous options for fun while also reinforcing the essential lessons and values taught throughout the school day.

Extended Day

Our Extended Day program allows busy working families the flexibility to drop-off before the school day starts and pick-up after the normal dismissal time. Our program is organized into five subject areas that are designed to provide your child with opportunities to learn valuable life skills, and to reinforce the skills they're learning during the school day, while providing plenty of time for fun with friends.

Program Details:

- Hours: 3:30pm – 6:00 pm
- Dedicated and specially trained staff members with experience in working with older children.

After School Clubs

Our After School Clubs are great ways for your child to expand on their interests or pursue new passions. These can be added in conjunction with our Extended Day Program or independently. This program offers families an opportunity to enroll their student in one or more days of after school activities without leaving the convenience of our campus.

Program Details:

- Hours: Varies by Club & Enrichment
- Dedicated and specially trained staff members in specialty area.
- Trusted Third Party providers in subject specific areas!

Extended Day

Extended Day

Our program is organized into five subject areas that are designed to provide your child with opportunities to learn valuable life skills and to reinforce the skills they're learning during the school day.

Students explore the exciting world of science, technology, engineering, art and math (STEAM) through building projects, experiments, and design challenges. Sharing ideas, asking questions, and making predictions are encouraged!

Robust outdoor free play and structured games help students learn sportsmanship and develop their physical strength and endurance. Students learn critical thinking and problem solving by participating in board games and team challenges with their peers.

Students express themselves by participating in hands-on visual arts, including photography, videography, drawing, and painting. Students develop planning skills by working on long-term projects with their peers and can participate in group performances or discussions.

Social and emotional growth is nurtured through student and teacher led activities that promote a feeling of community and belonging. Students learn through open-ended activities that give them a chance to apply problem-solving skills and collaborate with friends.

Some students appreciate the chance for independent activities or study after a long day at school. We provide a quiet place to work on homework, read, journal, or seek academic support from peers and teachers. Students can also work on various projects in this small group setting.

Introduction to Public Speaking

"This introductory public speaking program helps students practice the fundamentals that every child needs in order to communicate effectively — whether on the playground, in a classroom, or on the stage. Some of the skills we practice: Posture, Speaking clearly and with expressiveness, Making conversation. The program rotates to a new focus roughly every 10 weeks. Each 10-week term features a mini-presentation halfway through the term and ends with a creative project and presentation. The program requires some basic reading/writing skills, although for younger students we focus on in-class activities rather than handouts or written assignments."

Bow to Strings

This is an innovative music educational program that combines small group lessons with orchestra experience, created by Samuel Boruszko (Mr. Sam) - a former conductor and founding member of the renowned Simón Bolívar Symphony Orchestra, as well as a professional violin and viola player. Our program was inspired by Mr. Sam's many years of orchestral experience. He noticed students and even professional musicians improved faster while playing with other musicians. Playing and learning instruments in a group environment is not only fun, it effectively enhances skills like sight-reading, ear training, sense of musical timing and tempo etc. Students learn to play instruments with peers, besides getting personal attention from the teacher. Tuition includes instruments and materials - violins are provided with no additional charge! (Consent forms must be signed before taking our violins home.) Each group has limited space, sign up today!
